

# JAYANTH PUJAR

Data Analyst — Fraud & Risk | Cut fraud loss rate 30% → 12% at Flipkart | SQL · Python · Power BI  
+91 8088097956 | jayanthpujar033@gmail.com | [LinkedIn](#) | [GitHub](#) | Bengaluru, India

## PROFESSIONAL SUMMARY

Data Analyst with 2+ years of experience conducting deep-dive analyses and delivering data-driven recommendations to business stakeholders. Reduced fraud loss rates from 30% to 12% at Flipkart through SQL-driven pattern investigation and Power BI monitoring. Skilled in SQL, Python (Pandas, NumPy), and Power BI (DAX, Power Query), with a strong track record of identifying performance deviations, diagnosing root causes, and collaborating with business owners to implement optimization initiatives. Adept at working with both structured and unstructured data in fast-paced environments.

## TECHNICAL SKILLS

- Query Languages: SQL (Joins, CTEs, Window Functions), MySQL
- Python: Pandas, NumPy, Matplotlib, Seaborn
- Big Data: PySpark, Databricks (learning)
- Visualization: Power BI (DAX, Power Query), Excel (Pivot Tables, Charts, VLOOKUP), Seaborn
- Office Tools: Advanced Excel, PowerPoint, Google Sheets

## PROFESSIONAL EXPERIENCE

### Data Analyst – Fraud & Risk | Flipkart

Jul 2024 – Jul 2026

Operations & Risk Analytics | Bengaluru, India

- Reduced fraud loss rate from 30% to 12% by analyzing transaction and user data in SQL (Joins, CTEs, Window Functions) to identify fraud trends and drive prevention initiatives.
- Investigated fraud patterns such as repeated purchases, suspicious shipping addresses, and payment mismatches to support fraud investigations on Flipkart.
- Created and maintained Power BI dashboards using Power Query and DAX to monitor fraud KPIs, including flagged transactions, turnaround time, and loss trends.
- Developed Excel dashboards to monitor fraud cases, helping the team track suspicious activities more efficiently.
- Identified high-risk transactions to support fraud prevention initiatives, contributing directly to the loss-rate reduction above.
- Resolved issues related to Power BI, Excel dashboards, and reporting databases while validating data accuracy before publishing reports.

### Data Analyst Intern | Autoverse Mobility Pvt Ltd

Mar 2024 – Jun 2024

Bengaluru, India

- Extracted and processed over 500,000 data points via SQL pipelines and web scraping, building clean datasets for funnel and business performance analysis.
- Developed a Python automation tool using Pandas to streamline data processing workflows, applying statistical methods to identify trends and surface insights faster.

## KEY PROJECTS

### HR Analytics Dashboard | Power BI, DAX, Power Query, Excel

Dec 2023 – Jan 2024

- Built an interactive funnel-style attrition dashboard in Power BI tracking employee lifecycle stages — hire, retain, exit — with deviation analysis across departments and tenure bands.
- Defined KPIs, identified key drivers of attrition, and delivered structured recommendations to HR business owners to guide retention strategy.

## EDUCATION

### B.E. in Computer Science | KLE Institute of Technology

Jun 2019 – May 2023

- CGPA: 7.8
- Relevant coursework: Statistics, Machine Learning, Database Management, Data Structures & Algorithms

## CERTIFICATIONS

- Google Data Analytics Professional Certificate | Coursera
